Tips for beverage options to keep customers coming back for more

KEEP IT REFRESHING

Hydration stations
Offer plenty of water and electrolyte drinks like Energyade, especially if the event is in a hot or sunny location.

Iced drinks
Serve drinks over ice or offer frozen beverages like slushies or frozen cocktails to keep guests cool.

PRACTICALITY IS KEY

Easy-to-serve
Choose beverages that are easy to serve and consume. Pre-packaged drinks, cans, and bottles work well for large crowds and minimise waste.

Portable and spill-proof
Consider serving drinks in sturdy, spill-proof cups or bottles, especially in a setting where guests might be moving around a lot.

CREATIVE PRESENTATION

Themed drinks
Match your drink selection to the event's theme. For example, offer tropical drinks for a beach event or hot beverages for a winter gathering.

Drink stations
Set up different drink stations around the event, such as a lemonade stand, a cocktail bar, or a slushie station. This can also help with crowd management.

Garnish and flair
Add fresh fruit, herbs, or decorative straws to drinks to enhance the presentation and make them more appealing.

CONSIDER THE CROWD

Family-friendly options
Include a mix of beverages that appeal to both adults and children. Drinks like OROS ready-to-drink, fruit punches, and Rose's non-alcoholic mocktails work well for all ages.

Alcoholic options
If alcohol is served, offer options like pre-mixed cocktails using some of our bulk recipes for Rose's, local beers, and wine. Rose's cordials and mixers are perfect for creating quick and easy cocktails.

Energy drinks
Include options like Energyade Boost, especially if it's an all-day event.
